

## QUIETO

Hydraulic with delayed action

**ULTRA QUIET**  
 $< 9 \text{ DB}$

**WATER SAVING**  
 UP TO 5L A DAY\*

### Water saving **NF** inlet valve **QUIETEST INLET ON THE MARKET**

Thanks to the extensive research on its internal hydraulic system, the QUIETO inlet valve offers an exceptionally quiet operation. The progressive loss of pressure in the inlet valve allows a filling acoustic level among the quietest on the market with an acoustic level of only 9dB.

In addition, the delayed opening of the QUIETO delays the filling of the cistern while the flush valve is opened. This exclusive system saves 5 litres of water per day\*

#### FEATURES

- Hydraulic closure
- Water saving : save up to 3l per day
- 3/8" Brass tail
- Pressure range 0,5 - 12 bars
- Ultra quiet : 9dB
- Flow rate 3 bars : 7,2 l/min
- Water level range adjustment : 90 mm
