ALL-IN-ONE TOILET
MAINTENANCE SYSTEM

PRODUCT COMFORT

MULTICARE
WC

Number one novelty : the MK 3050W® A “cure” which respects water quality and replaces all the usual toilet cleaning products.

The **MK 3050W®** is a multi-function formula which eliminates limescale, fungus, algae and bacteria. It deodorises and perfumes and is chlorine-free (compatible with septic tanks). Its blue colour stops photosynthesis.

A “universal formula”, which does not pollute the tank, makes the toilet bowl shine, ensures efficient evacuation and a fresh smell in the bathroom while protecting the sealing joints at the same time!

Consists of organic acids excluding biocide (according to directive 98/8/CE) This product is not dangerous (the formula has been sent to the anti-poison centre in Paris. Data sheet available on request.)

NF T01/102 ISO 11014-1

2 perfumes available:

Verger (lavender fields)

Provence

MK 3050W® Combines, in its exclusive formula, natural essences supplied by an authentic perfume-maker in Grasse, the home of perfume.

N.B. : un flacon = 500 ml (contenance du doseur), vendu par 2 soit 500 chasses.

2nd novelty : The diffuser

The other great novelty of the **MULTICARE WC** system lies in its combined diffusion technology. The diffuser is made up of a 500ml capacity reservoir, a 2ml doser and a float which ensures opening and closure of the doser. After each flush, the doser pours the product in while the toilet tank is filling up. The design of the doser enables it to start refilling with **MK 3050W[®]** without wasting any product, before it closes again. Once it has been installed in the tank, there is no need for any manipulation; refilling is done via the 2nd hole.

This is an economical and precision system which avoids the saturation problem, common to products in permanent contact with water. The capacity of the diffuser being equal to that of the refills, the dangerous storage of opened containers is eliminated.

Easy to install

Open the toilet lid

Fasten the diffuser next to the 2nd hole

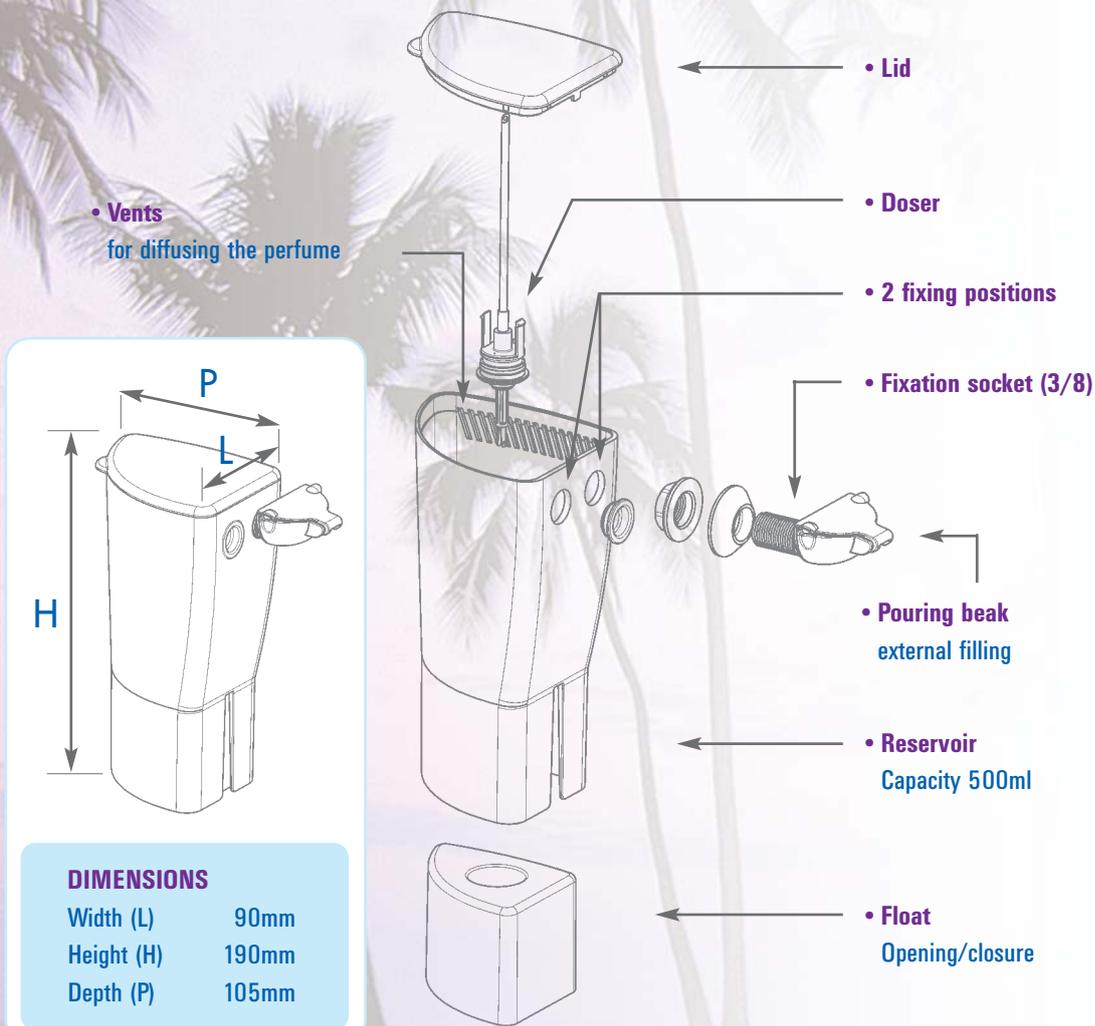

Once it is in place, close the toilet lid

Fill the diffuser with a full refill, using the external pouring beak.

Technical characteristics

the first quality label for intimate comfort

A label which promises!

To obtain the CHRYSALIS label, bathroom equipment and products must possess 7 criteria :

- Significant improvement of intimate comfort
- Proven technological innovation
- Certified environmental respect
- Overall quality of the system or product
- Performance proved by tests
- Easy to install
- Easy to maintain

CHRYSALIS is the first quality label specifically dedicated to bathroom ware
